# San Francisco Cobblestone

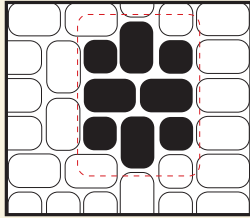

A winding walkway through the garden. A welcome approach to your doors. San Francisco Cobblestone presents the ideal choice for those who desire surroundings that combine elegance with a comfortably rustic ambience. For your hardscape designs that require more formal styling, these pavers offer the traditional look and feel of centuries-old Roman cobbled block.

Creativity doesn't end there. In the Renaissance colors, the collection will also provide you with the opportunity to design complementary walls and stairways that create your personal statement, drawing people closer. Its earthy hues will allow you to harmonize environment and home exterior, whatever their style, to create an inviting haven of tranquility and warmth.

Although every attempt has been made to display realistic product photographs, color may vary due to the printing process. It is recommended that actual product samples be requested, as variations in colors and shades of color on all units, as well as aggregate exposure, are inherent in all integrally-colored concrete products. No claims will be allowed regarding variations in any of the products shown.

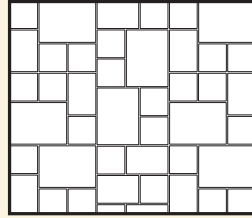

**NOTE:** Custom colors are available by special order, please allow sufficient lead time. For more information please contact your local Basalite Representative.

## Patterns

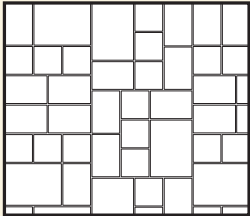

**Interlace-1**

80% Rectangle and 20% Square.

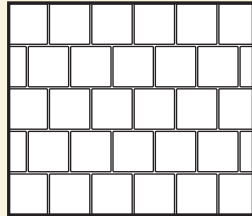

**Random-1**

40% Mega, 20% Rectangle and 40% Square.

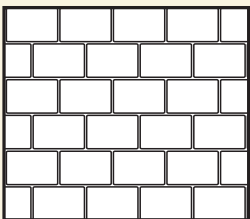

**Random-2**

29% Mega, 42% Rectangle and 29% Square.

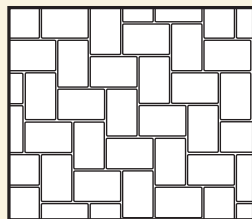

**Square Running Bond-1**

100% Square.

**Rectangle Running Bond-1**

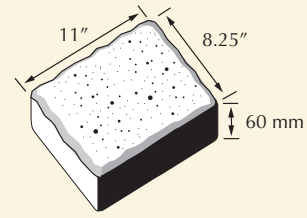

100% Rectangle.

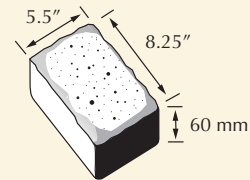

**Herringbone-90 Degree**

100% Rectangle.

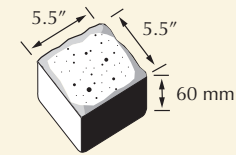

## Specifications

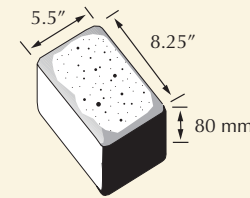

Style: Mega  
Size: 8.25" x 11"  
Thickness: 60 mm  
Weight: 19 lbs  
Units/Pallet: 160  
Sq. Ft./Pallet: 102

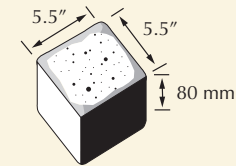

Style: Rectangle  
Size: 5.5" x 8.25"  
Thickness: 60 mm  
Weight: 8 lbs  
Units/Pallet: 384  
Sq. Ft./Pallet: 121

Style: Square  
Size: 5.5" x 5.5"  
Thickness: 60 mm  
Weight: 6 lbs  
Units/Pallet: 512  
Sq. Ft./Pallet: 107

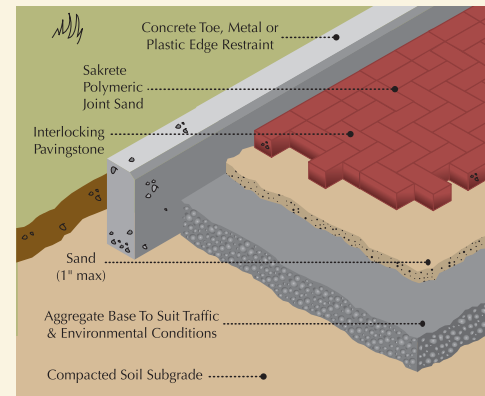

Style: Rectangle  
Size: 5.5" x 8.25"  
Thickness: 80 mm  
Weight: 10 lbs  
Units/Pallet: 288  
Sq. Ft./Pallet:

## Installation

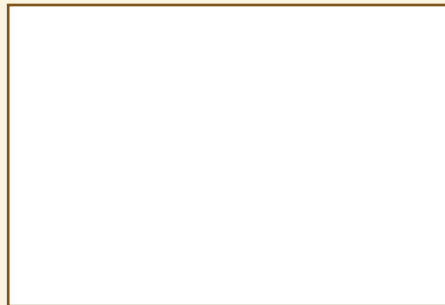

1. Excavate unsuitable, unstable or unconsolidated subgrade material and compact the area which has been cleared. Backfill and level with dense graded aggregate suitable for base material (typically 3 to 6 inches for pedestrian and light vehicular traffic, 6 to 12 inches for heavy vehicular and industrial) or as otherwise directed by site engineer/architect/landscape architect.
2. Install edge restraint using concrete curb, concrete toe or Edging.
3. Place bedding course of sharp normal weight screening or concrete sand to a uniform depth of approximately 1" leveled to grade.
4. Install Basalite Pavers hand tight with joints approximately 1/8".
5. Where required, cut stones with an approved cutter to fit accurately.
6. Tamp pavers with mechanical vibrator uniformly level true to grade and free of movement.
7. Fill voids in joints by sweeping dry fine sharp sand over pavers.

# Visit Us Online

For more information about Basalite® paving stones, retaining walls, accessories, patterns or installation instructions visit us online at [basalitehardscapes.com](http://basalitehardscapes.com). Don't forget to try Basalite®'s interactive paver viewer which allows you to view Basalite® pavers in a variety of settings. You can also use our Online Estimator to help calculate your next paver or wall project.
